

# Website Rebuild & Optimization for Engineering Consultancy

## PROJECT DETAILS

 Web Development

 Aug. 2020 - Ongoing

 Less than \$10,000

*"Their team's knowledgeable and reliable."*

## PROJECT SUMMARY

Perpetual Solution recoded pages to improve the speed of a website. The team integrated Google Analytics and metadata tags into the site. They also migrated the platform onto a new hosting service.

## PROJECT FEEDBACK

Perpetual Solution delivered a superior website that functions not only dependably but also quickly. They executed the platform's hosting migration during the weekend to prevent downtime. The team rapidly responds to requests and inquiries. Their professionalism ensures a seamless partnership.

## The Client

Introduce your business and what you do there.

I'm the head of IT for an engineering consulting company.

## The Challenge

What challenge were you trying to address with Perpetual Solution?

We built a website that loaded slowly. We wanted to put a video on the first page, but the video was glitchy. We also wanted to improve our Google Analytics.

 Head of IT,  
Engineering  
Consultancy

 11-50 Employees

 Montreal, Canada

### CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

### What was the scope of their involvement?

Perpetual recoded some of our website's pages. They applied for a Google My Business profile and integrated metadata tags into our website. Their team also moved us to a new hosting service. We went live about two weeks ago. Now, we're working on the French part of the website.

### What is the team composition?

Gen's (Owner) my primary contact.

### How did you come to work with Perpetual Solution?

Perpetual seemed professional and answered all of our questions in a timely manner.

### How much have you invested with them?

We signed for the deal of \$99 per month. We paid the first three months upfront and now, we pay on a monthly basis.

### What is the status of this engagement?

We started working with Perpetual in August 2020, and we're still working together.

## The Outcome

What evidence can you share that demonstrates the impact of the engagement?

All of the promises Perpetual made, they delivered. Now, the website's reliable and fast; the speed's perfect. However, it's too early for Google to parse through the whole website.

When we moved hosting services, we didn't want any glitches in the emails that the company uses. Perpetual worked from Friday night until Monday to make sure that everything was up and running without any downtime.

How did Perpetual Solution perform from a project management standpoint?

They respond to our emails and requests quickly. For example, when they recoded parts of the website, several features looked differently from how we designed them. When we told them that we wanted them to look as we designed them, they made the changes right away.

What did you find most impressive about them?

Their team's knowledgeable and reliable. It's easy to work with Perpetual. They're true professionals. We haven't had a single bump in the road.

Are there any areas they could improve?

No, our engagement's one of the easiest I've ever had.

Do you have any advice for potential customers?

Just go for it. Don't look around because Perpetual's the one.
